Innovative Cloud-Based Solutions

► Aloft Everywhere

Desktop: Your classroom where you are. All learning materials, tools, projects, and interactive experiences in one place. No expensive software. No large downloads.

- Accessible across a wide range of platforms and devices
- Customizable - all your course materials, tools and projects in one place
- Affordable - no specialized software, hardware or books needed
- Interactive - offers a platform for student/professor real-time engagement
- Easy to use - integrates seamlessly into your learning environment
- Available 24/7
- Insightful student engagement metrics

► Aloft Immersion

Hands-on Experience: Your dynamic, scenario-based experiential platform for secure and sophisticated simulations.

- Secure, interactive environment for students to learn and practice
- Engages students in real-world, scenario-based simulation
- Dynamic project completion allows students to engage when and wherever they are

► Aloft Passport

Cloud-based scalable delivery of graphic or computing-intensive applications

- No computer lab required. Your applications where you are
- Easy access to graphic or computing intensive resources
- No student technology requirements - just a web browser
- Reduces the need for capital-intensive, underutilized computer labs

AccelerEd was born from the University of Maryland University College (UMUC) Office of Technology. As one of the largest distance learning institutions in the world, UMUC built a world-class technology infrastructure. We brought that talent, experience and knowledge to AccelerEd.

We bring innovative, student-centric immersive and hands-on experience that makes learning more efficient and effective. It allows students to focus on mastering the material and educators to focus on teaching.
